3. Bulk SMS

DTL offers both personal and group SMS communication solutions to business and final consumers. We offer a comprehensive web-based customized messaging portal for your bulk sms services and needs. Our bulk SMS services can be used to send high volumes of messages to inform people about important meetings, events, notifications, campaigns or promotions

4. Interactive Voice Response (IVR)

DTL has an IVR, and SIP VoIP applications. Basically, we build for you an automated customer service voice application that will act as your call receiver and guides the caller through the menu. It can also re-route the call to a designated number for further consultation or an appointment or any other purpose that the client deems fit. Our IVR platform also supports bulk voice messages modified to suit our clients.

5. Mobile Content

Our mobile content platform provides you with up to date information in all aspects of life. We use a mind mapping technique to ensure that we deliver to you information that is relevant and accurate! Always be informed! With DTLL's diversified mobile content platform, you can subscribe to any of our keywords and receive information as it happens. You can be the first to know the breaking news by simply typing "KEYWORD", and send to 8833. For example, for breaking news, you can type "BREAKING" and send to 8833. We have very many keywords you can subscribe to. It is that simple!

6. Web Hosting

Given the number of cloud services we run off our infrastructure, DTL provides affordable website hosting services to small and medium businesses. Our services includes reseller hosting where you can make money with your own web hosting business, VPS hosting where you have dedicated functionality for your website and dedicated server hosting, domain name registration is possible as well.

7. Web mail services

We provide professional email services such as info@yourorganization.com, In this we provide you with space for storing attachments, forwarding services, digital signatures, auto-responders and security for your emails.

8. Software Development

We also create custom made applications for clients with functionality tailored to meet their needs. Such systems include information systems, business solution systems, security systems and educational systems.

9. Digital Marketing

We do digital marketing on social media like Facebook, Instagram, Twitter, LinkedIn, etc. We do this in form of static graphics, motion graphics and simple illustrative videos.
